Factsheet, 30.06.2025

Risk profile of fund

The risk profile defines the risk assessment of the fund - one blue box low risk, seven blue boxes very high risk.

Description

The Value Investment Fonds Klassik is based on the principles of the capital market theory by Markowitz. The Fund's objective is to achieve a stable annual return with a minimum risk by optimizing the asset allocation of the portfolio. Actually the func invests 30 % in equities (USA, Europe and Japan) and 70 % in fixed income assets, which consist of government bonds or high quality bank obligations, convertible bonds, corporate bonds and emerging market bonds. These asset categories are managed close to the relevant index. Two thirds of the equity portfolio are partly hedged with a certain options strategy (e.g. covered call writing). The fundmanager observes the optimization of the asset allocation. Additionally there are no tactical ambitions to increase performance through market timing or stock-picking on the basis of market projections.

Important Notification

This fact sheet does represent neither investment or risk advice nor a public offer nor recommendation to buy or sell securities. Investment generally involves certain risks. Past performance does not guarantee certain results in the future. The return may also rise or decrease because of currency fluctuations. In the performance data calculation front end loads and redemption fees, depository or other fees and taxes are not considered. For more information please refer to the official prospectus and the Key Information Document (=BIB) in German (only valid for public offer in Austria) at Security KAG or Liechtensteinische Landesbank (Österreich) AG (as custodian).

This fund is a registered UCITS incorporated under Austrian law and is only registered for sale in Austria. The tax treatment depends on the residence of the investor and the applicable national laws.

Values per share, Performance: OeKB; Performancechart, fund's composition: Liechtensteinische Landesbank (Österreich) AG, Bloomberg and own calculation
